Coming soon: NAFTA webinar and National Cyber Security Strategy

NAFTA

Negotiations are still underway regarding NAFTA. ITAC is continuing to monitor digital trade and other chapters pertinent to our members.

There is speculation of an “agreement in principle” that would focus on the automotive and agricultural sector, with negotiations on other files continuing.

ITAC will be organizing a NAFTA Webinar in May with leading North American trade expert [Laura Dawson](#), Director of the Canada Institute at the Wilson Center. An invitation will be sent to members shortly; or visit www.itac.ca/events for details in the coming weeks.

National Cyber Security Strategy Update

No recent details have been released on Public Safety’s Cyber Strategy. We expect it to be released prior to Parliament’s summer break in June.

ITAC continues to engage directly with Public Safety, including Minister Goodale’s office, to determine how our members can best engage and learn about the Strategy once it is released. Information will be shared as soon as it is released.
