Members in the news: PCL Construction and Microsoft are Building Smart

According to a recent release from PCL Construction (PCL), PCL and Microsoft are joining forces to fuel joint innovation and development of smart building implementations. Combining PCL's engineering and industry expertise with the technical acumen of Microsoft's engineering and R&D teams, PCL is leveraging advanced Azure capabilities to develop the next generation of Smart Building solutions.

Supporting these solutions is the full range of Azure services, including Power BI, Azure IoT, and Microsoft's advanced analytics and Artificial Intelligence capabilities. To learn more, [click here](#).

Also from PCL, the PCL family of companies has been recognized by PwC Canada as a 2018 Vision to Reality (V2R) Awards finalist in the reinventor category. Award winners will be announced at the 2018 V2R Awards ceremony on May 10 in Toronto.
