Ontario Votes Progressive Conservative

After 15 years, the political tide has shifted significantly in Ontario, with Doug Ford, PC, as Ontario's new Premier.

The results:

PC: 76
NDP: 40
LIB: 7
GRN: 1

With the hard-fought election now over, ITAC looks forward to working with the new PC government to ensure continuing commitment to develop Ontario's digital economy. Our post-election strategy will involve engaging with the new government, at the Ministerial level as well as with new staffers.

We expect to carry out a **Queen's Park Day** this fall, similar to last week's **Hill Day** in Ottawa, as well as **Fireside Chats** in Toronto with staffers. These meetings will provide a comprehensive overview of the technology industry in Ontario, issues and emerging trends impacting our sector, as well as opportunities we can work together. The majority of this engagement will be in the Fall once officials are in place and Ministers in place.

ITAC will be seeking input from its membership, to ensure our messaging is consistent and reflects our industry's concerns and goals for the future.
