Guidelines for Experience Criteria and Corporate References in ITQ and RFX has been published

Shared Services Canada (SSC) has published the “Guidelines for Experience Criteria and Corporate References in ITQ and RFX.” To all association members, we greatly appreciate the considerations, expertise, and lessons learned that you have shared it helped in the development of the guidelines for SSC’s procurement specialists.

SSC’s aim is to ensure that they are used to effectively evaluate competing vendors, that the appropriate evaluation criteria are used, and that validation is performed in a **consistent** manner.

These Guidelines have been published on SSC’s intranet and will serve as a training tool and reference point for contracting and technical authorities. You can also review them by [clicking here](#).

This document is evergreen and will continue to evolve as SSC and industry identify and incorporate further improvements through continued consultation and feedback.

Thank you for your continued collaboration. If you would like more information about this, please contact Andre Leduc, Vice President, Government Relations & Policy at aleduc@itac.ca
