## Wage subsidies of up to \$7,000 available for student placements

Are you looking for fresh idea and approaches for your organization? Need to fill temporary HR needs? Want to reduce future recruiting cost? Check out the ITAC Career Ready Program. It matches current post-secondary students who are studying in the areas of [Business Technology Management](#) (BTM), Computer Science, Computer Systems Technology, Computer Engineering (or alike programs) with SME's across Canada.

The program provides up to 50 per cent (to a maximum of \$5,000) of a work term student's pay in wage subsidies to employers. Employers that hire students from underrepresented groups including women in STEM, indigenous students, recent immigrants, persons with disabilities, and first-year students may also qualify for additional funding (up to 70 per cent or \$7,000).

Students are highly motivated and ITAC works closely with the work term department staff at the post-secondary institutions to help students and employers bridge the school-to-work transition.

There are currently 355 wage subsidy spots available for the summer 2019. Applications begin in January 2019. More information will be shared in December about this.

In the meantime, if you'd like more information about the program, or would like to speak with another member who has utilized this program for their own organization, please contact Jan Hall at [jhall@itac.ca](mailto:jhall@itac.ca) or visit [www.itactalent/careeready](http://www.itactalent/careeready).
