ITAC Cyber Technology Summit coming soon!

Mark your calendars! On **October 30, 2018**, ITAC will host its inaugural **ITAC Cyber Technology Summit** – a one-day event that pulls together leaders from the Canadian cyber technology industry who wish to learn more about the Government of Canada's cyber technology plans, including Canada's Cyber Technology Strategy. Senior Government officials will also be in the room as we want to bring the best of Canadian cyber to the Ottawa.

The Summit will be held in Ottawa at the Shaw Conference Centre.

We want to explore the relationship between the cyber industry and government, how government wants to keep the economy cyber secure, the need to develop cyber talent, and international opportunities for our technology.

Details, including how to register, will be shared with ITAC members shortly. In the meantime, if you have any questions, please contact ITAC Vice President, Policy, Nevin French at nfrench@itac.ca
