Symantec Develops New Attack on Cyberhacking

Declaring Antivirus Software Dead, Firm Turns to Minimizing Damage From Breaches

By DANNY YADRON

Updated May 4, 2014 10:41 p.m. ET

Symantec Corp. invented commercial antivirus software to protect computers from hackers a quarter-century ago. Now the company says such tactics are doomed to failure.

Antivirus "is dead," says Brian Dye, Symantec’s senior vice president for information security. "We don’t think of antivirus as a moneymaker in any way."
“Anti-virus now lets through around 55% of attacks”
