ITAC creating two new working groups focused on AI and digital-related tax issues: member input requested

AI Working Group

To date, Federal government adoption of Artificial Intelligence (AI), Machine Learning, Cognitive Computing and Robotic Process Automation has been slow. To help further the adoption of AI in public and private sectors, ITAC will be establishing an **AI Working Group** to draft a report on AI, opportunities, ethics, adoption, and dispelling the myths. If you are interested in participating, please contact [Andre Leduc](#), VP, Government Relations and Policy, or [Nevin French](#), VP, Policy.

Taxation Working Group

ITAC will be forming a short-term **Taxation Working Group** to discuss a potential Digital Sales Tax, Income Tax shifts, RSUs and Stock Options review that are likely coming in the upcoming Parliamentary session.

A call will be held during the first week of November. There will be a call next week, please contact [Andre Leduc](#), VP, Government Relations and Policy for more information.

For these two Working Groups, if you have already expressed interest, we have your contact.
